

GRAND LION

ZXAUTO

GRANDLION

Born for this.

Introducing the Grandlion. Engineered with uncompromising power and equipped with advanced features for your convenience. Fitted with premium comforts to give you the best experience. Take hold of the reins and get ready for unforgettable adventures. Designed to meet the demands of modern drivers, it blends cutting-edge technology with rugged durability for a ride that's as reliable as it is exhilarating.

ZXAUTO
GRANDLION

PERFORMANCE

A force to be reckoned with.

The same 2.3T diesel engine for Mercedes-Benz/Renault/ Nissan and other brands

Intelligent 2.3T turbocharged diesel engine, with a maximum power of 163 hp and a maximum torque of 380 Nm

Torque strength: excellent low-speed power, maintaining peak torque at 1500~2750 rpm

Low loss: piston skirt graphite coating/piston pin excirclediamond-like coating

Ultra-silent: double overhead camshafts structure / powder metallurgy timing gear / timing silent chain technology

With a large vehicle body the average fuel economy on our diesel engine under different conditions is 29mpg.

The GrandLion's engine has been finely tuned by Delphi for impressive power and fuel efficiency. Key parts, like the variable oil pump and low-friction pistons, reduce internal resistance by 15%, boosting performance.

Plus, the engine weighs just 462 lbs—over 88 lbs lighter than typical engines—helping improve overall efficiency and handling.

The GrandLion features a smooth and efficient ZF 8 speed automatic transmission which contributes to it's fuel economy.

The GrandLion is built with high-strength composite materials and 61.3% high-strength steel, making the body lighter, stronger, and more fuel-efficient. Smart design technology places materials where they're needed most, enhancing safety, durability, and overall performance.

An aluminum-magnesium alloy double wishbone provides a strong yet lightweight suspension system. The high-performance wheels are aerodynamically optimized to reduce air resistance, ensuring smoother and more efficient driving.

Take on the toughest demands.

The Grandlion is our toughest, most capable and most advanced body-on-frame hauler to date.

Front suspension: aluminum-magnesium alloy double wishbone with good support and accurate steering

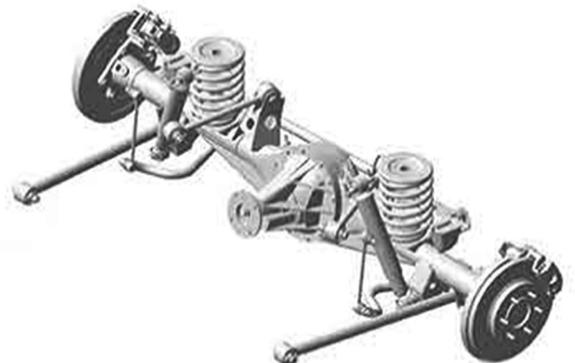

Fully boxed steel frame and multi-link rear suspension

The Grandlion's fully boxed, 58% high-strength steel ladder frame provides enhanced rigidity, capability and driving comfort. The rear frame member is widened to improve stability and towing capability. For more reinforcement, the frame cross members are more than doubled in size making Grandlion the most durable body-on-frame hauler to come off our new assembly line.

A modern suspension to match its modern fully boxed frame, Grandlion's multi-link rear suspension delivers ride comfort, straight-line stability and better over all handling dynamics on the road, trail and everywhere in between. With a coil-spring suspension, Grandlion delivers better roll damping and towing performance.

Rear Suspension

Multi-link rear suspension which reduces vehicle vibration and improves riding comfort

A first-class cabin.

Interiors adopts American pickup style, with a large number of strong lines for rugged overall visual perception. Transverse wide center console + ultra-wide console passage, large-area leather embellishment texture and stitching design, with transverse decorative trims for grace and luxury, 151.8ft³ super-large driving and riding space, comparable to large SUVs such as Mercedes-Benz GLE/Audi Q8.

Premium leather-trimmed seats

Bring maximum comfort to wild rides. Grandlion's available premium leather-trimmed seats are designed with a wide shoulder to give you more support.

Comfortable Front Row

The left- right width of the front row is 65.3in, and the height from the roof to the floor is 43.3in. Even if the driver is 6ft tall, there is still a fist and a half space from the head to the roof.

Spacious Rear Row

The left- right width of the rear row is 65in, the height from the roof to the floor is 47.6in, and the lateral length of the seats is 54.3in, with wide space for three adults. The inclination of seat backrest in the second row is 116°, brings more comfort experience for long journey with family/friends, without the feeling of fatigue.

Three-spoke sports steering wheel

10.1" HD large screen

Stereo laser engraving

Driver and passenger power seat

Ultra-wide multi-functional console

Cool ambient lighting

EXTERIOR

Modern Muscle.

The ZX Auto Grandlion features a rugged, modern design ideal for Belize's mix of city streets and off-road terrain. Its high clearance and sturdy build suit both urban use and adventurous travel, while its bold look appeals to drivers seeking style and practicality in a versatile vehicle built for the country's diverse landscape.

LED Headlights with bold styling

18in black alloy wheels with Cooper tires

Contemporary rear lights

Modern front grille and lighting

Red front tow hooks

Sleek side mirror with indicator + camera

SAFETY

Equipped for adventure.

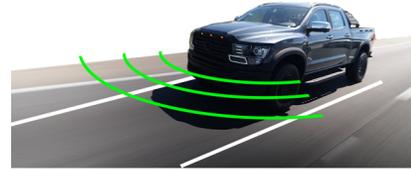

Built to take your outdoor adventures to the next level. With features like the BorgWarner 4WD system and oversized off-road tires, you're fully equipped to tackle any trail. It's not just about performance—it's about capability and style too. Plus, the fully welded frame adds extra strength and resists corrosion, so you can count on durability wherever the road (or lack of one) takes you.

Safety Features.

LANE DEPARTURE WARNING SYSTEM (LDWS)

The system uses a front-view camera to detect lane markings and alerts the driver with visual and audible warnings upon unintentional lane departure.

360 CAMERA

The HD 360° surround view camera captures images around the vehicle to assist the driver in maneuvering safely and avoiding potential collisions.

FRONT COLLISION WARNING (FCW)

To prevent delayed braking, the system detects collision risks and provides visual, audible, and mild braking alerts based on the level of emergency.

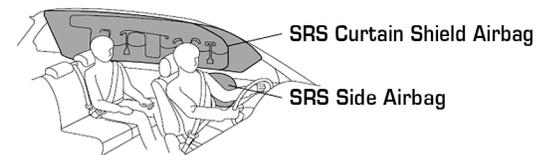

HILL DESCENT CONTROL

Hill Descent Control maintains a steady, controlled speed on slopes by automatically braking, letting you focus on steering for a safer off-road experience.

CURTAIN AIRBAG

Curtain airbags deploy from above side windows during side impacts or rollovers, cushioning occupants' heads to reduce injury and ejection risk.
